

Andrea Valente, PhD

Senior Data Analyst | Analytics Engineering | Machine Learning

📍 Nicosia, Cyprus (Italian national) | ✉️ avalentecs@gmail.com | ☎️ +357 96 732 397

Professional Summary

Senior Data Analyst with a PhD and 10+ years of experience across fintech, telecoms, and consulting. Combines rigorous analytical thinking with hands-on data engineering: building end-to-end pipelines (Prefect, Airflow, dlt, dbt, PostgreSQL), automating reporting workflows, implementing Machine Learning models, and producing clear, decision-ready analysis for business stakeholders. Track record of working independently to deliver production-grade data infrastructure, not just notebook prototypes. Equally comfortable structuring a data model and communicating findings to non-technical audiences.

Technical Skills

Analytics & Data: SQL (PostgreSQL), Python (Pandas, NumPy), R, Statistical Analysis, Time-Series Analysis, Outlier Detection

Analytics Engineering: dbt, dlt, Prefect, Airflow, data pipeline design, automated reporting, data quality & validation

Visualisation & BI: Power BI, Tableau, Excel (Advanced)

Infrastructure & Tools: Docker, Git, AWS (S3, Glue, Athena), Terraform (working knowledge)

Databases: PostgreSQL, SQL Server, DynamoDB

Professional Experience

Data Analyst & Analytics Engineer | **Silverheight Marketing** — Nicosia, Cyprus
Feb 2026 – Present

- Sole data function at an early-stage startup; established the full analytics stack independently from scratch.
- Designed and built a production data pipeline (dlt + Prefect + PostgreSQL) ingesting data from Zoho CRM and Voiso telephony; deployed on a Hetzner cloud server with scheduling, monitoring, and failure alerting.
- Developed dbt transformation layer including sales funnel modelling, contact event timelines, and a 7-level pipeline status classification to support commercial reporting.
- Built and automated weekly reporting workflows delivering structured email reports to stakeholders, removing manual effort from recurring business reviews.

Independent Consultant | **University of Oxford Research Project** — Remote
Dec 2025 – Present

- Engaged as an independent consultant on a linguistic research project, responsible for data preparation, wrangling, and quality validation.
- Built a lightweight data pipeline using Airflow and dbt to process source data into a structured PostgreSQL database for downstream analysis.
- Implemented Python algorithms for dataset correction and validation, ensuring consistency and reproducibility of analytical outputs.

Freelance Data & Cloud Consultant | **Independent** — Remote Nov 2024 – Present

- Built automated data collection and processing pipelines using AWS serverless services (S3, Glue, Lambda) to acquire and validate data from third-party APIs.
- Used Terraform for reproducible and secure cloud environment provisioning.

Senior Data Scientist / Data Analyst | **Proddis Ltd** — Limassol, Cyprus *Feb 2023 – Jun 2024*

- Cleaned and preprocessed unstructured medical text data; built interactive dashboards and application prototypes to support stakeholder feedback and data-driven decisions.
- Developed and productionised an ML text classification model (FastText, Transformers) served via a FastAPI endpoint.

Data Scientist | **Bottomline Technologies** — Reading, UK *Jan 2020 – Feb 2023*

- Analysed millions of financial transactions using SQL and Python to design and deploy anomaly detection models identifying fraudulent activity.
- Architected a consolidated customer data mart integrating Salesforce and CreditSafe data, creating a reliable single source of truth for commercial and product teams.

Data Scientist | **Tesco Mobile** — Slough, UK *Nov 2018 – Jan 2020*

- Quantified marketing campaign impact via time-series analysis in R (Prophet) to model baseline trends and measure incremental lift.
- Built the company's first predictive churn model using Python and SQL, prioritising retention efforts for at-risk customers.

Data Scientist / Data Analyst | **Cognizant** — London, UK *Apr 2016 – Oct 2018*

- Designed and maintained Power BI dashboards providing real-time operational insights for Heathrow Airport management.
- Built and deployed an ML model on Azure to optimise aircraft stand allocation based on complex operational data.

Education

PhD in Cognitive Neuroscience — University of Geneva, Switzerland (2014)

Certifications

AWS Certified Solutions Architect – Associate (2024) | Data Science MicroMaster, UC San Diego / EdX
